Climeworks Solutions

Carbon removal for climate impact

100%

Nature-based CDR (short carbon cycle)

Engineered CDR (long carbon cycle)

0%

Today   Net zero
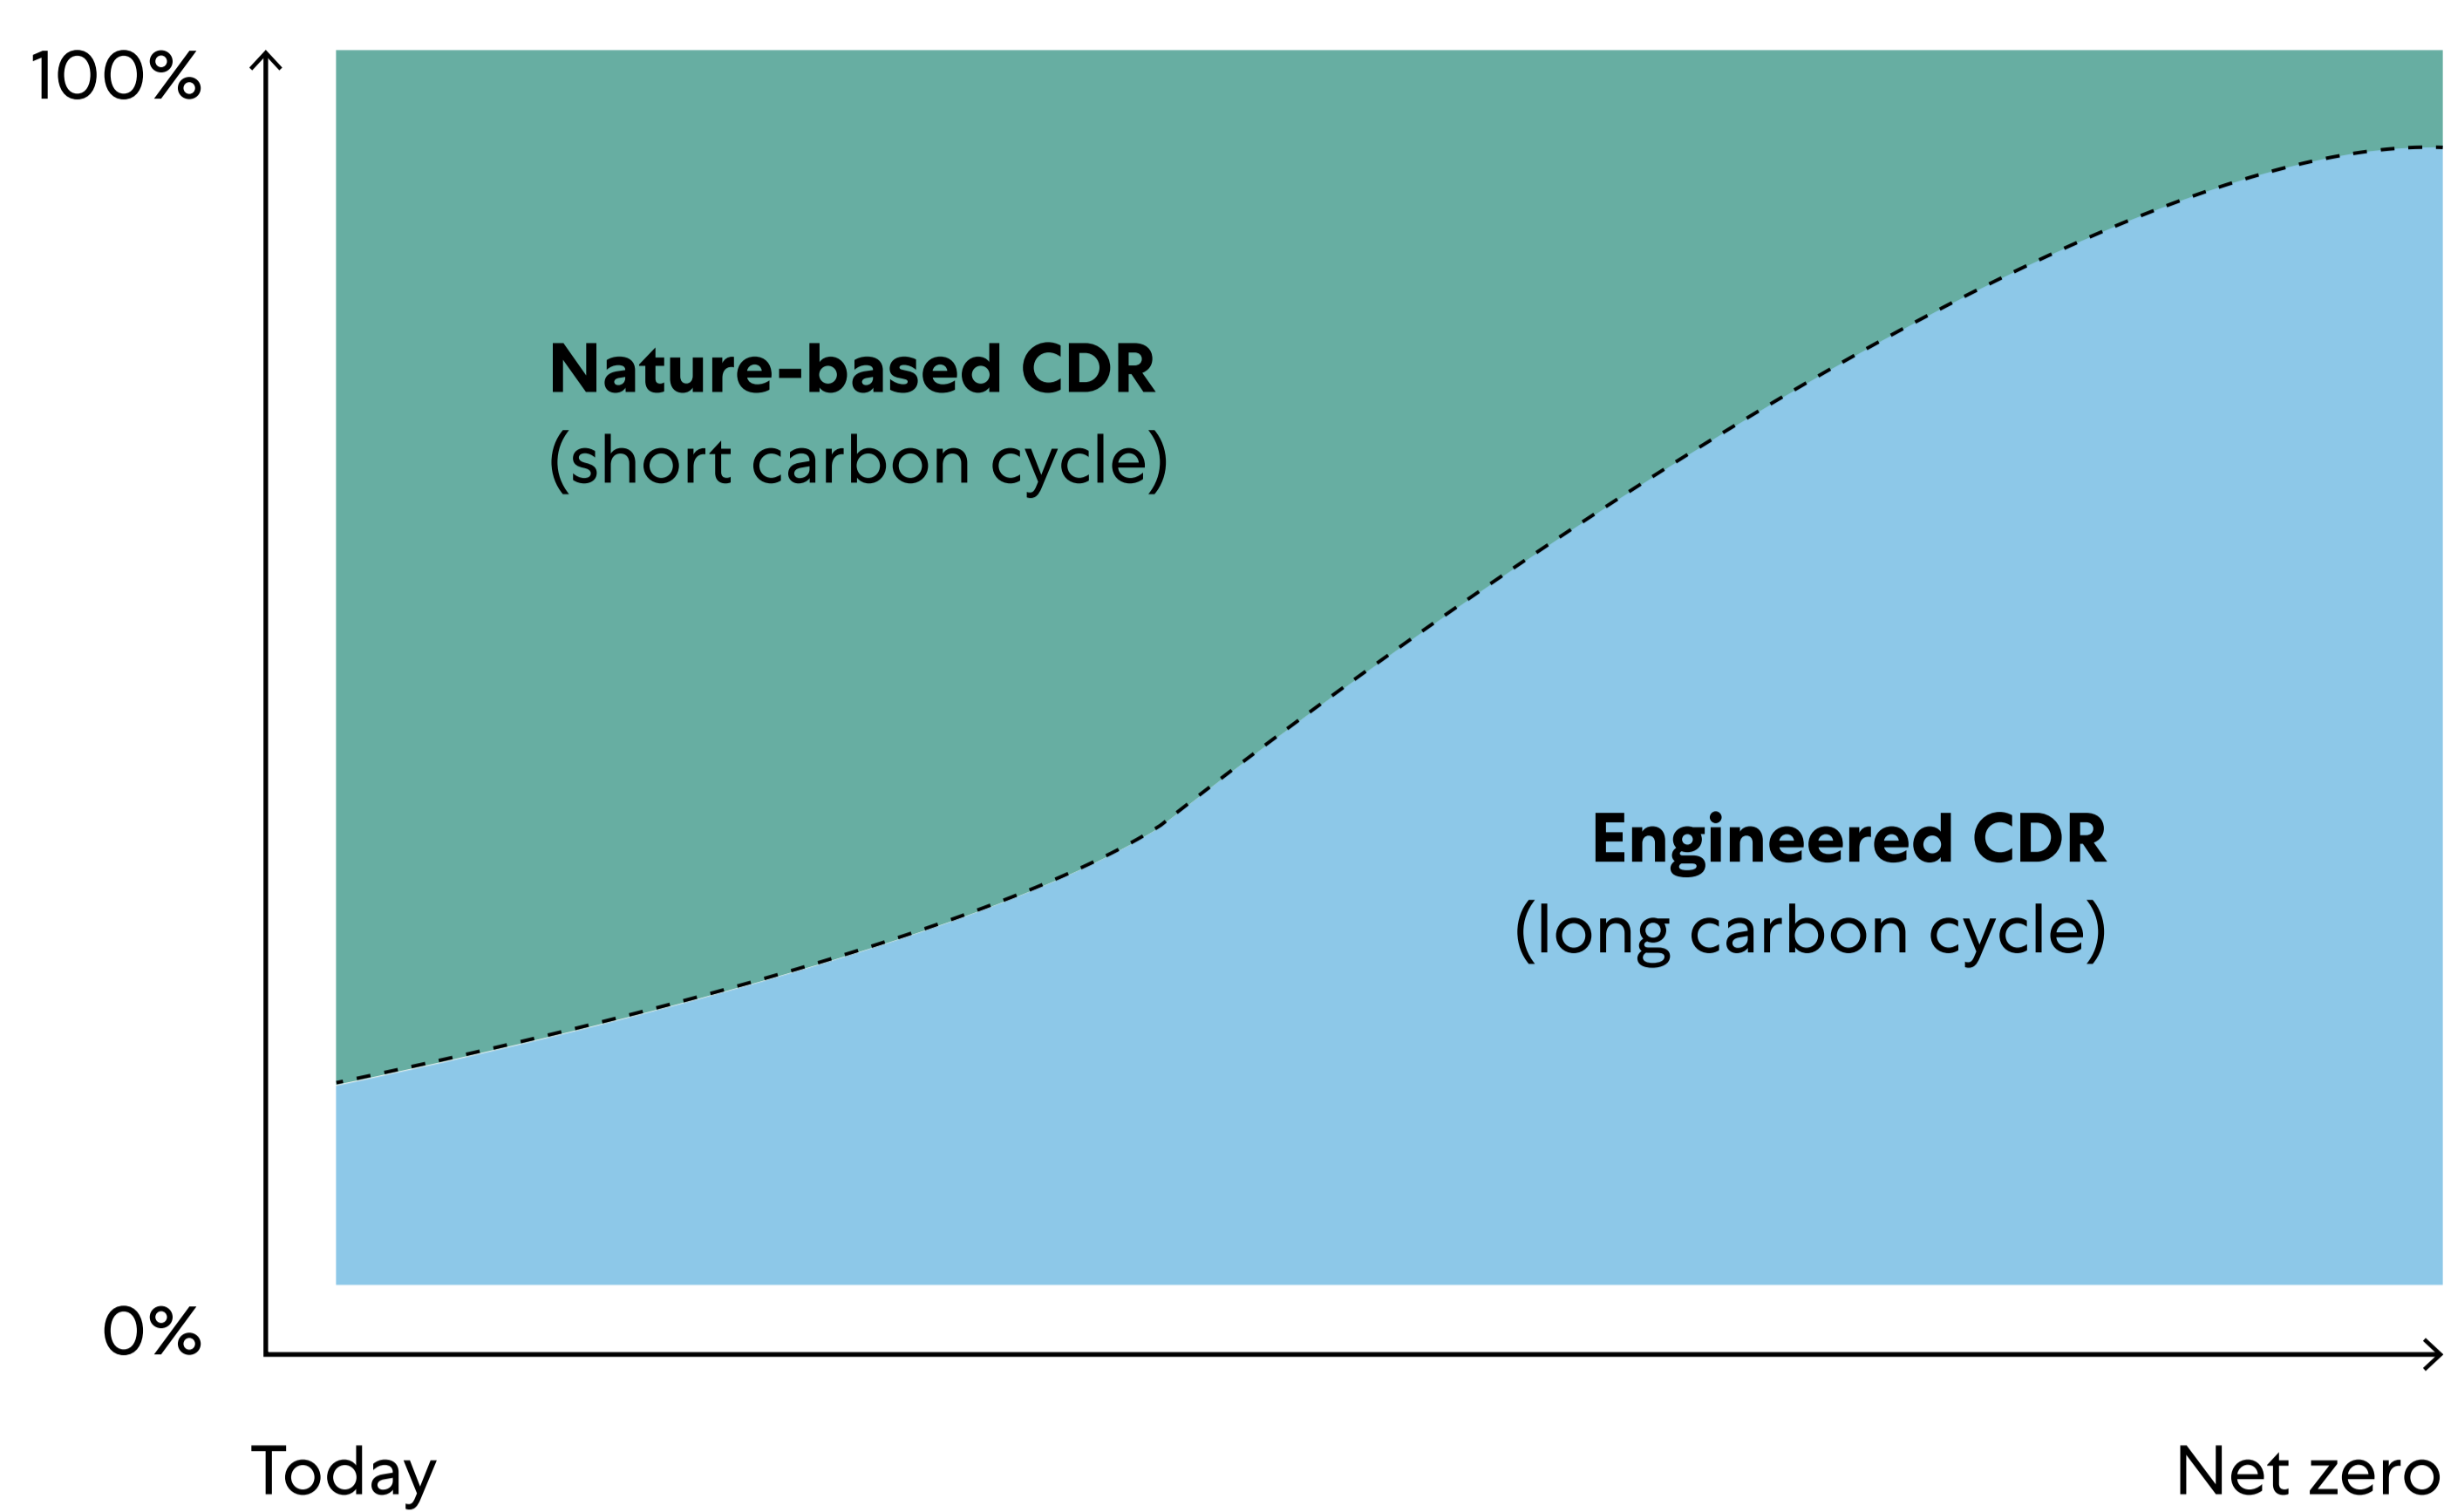

* Illustrative portfolio evolution, as per scientific guidance

Decarbonizing the economy is essential to limiting global warming, but it must be complemented by carbon removal to get us to net zero.

Climeworks Solutions provides high-quality, thoroughly vetted portfolios of carbon removal solutions to help your business address hard-to-abate CO_2 emissions and meet your net-zero targets with confidence.

Climeworks Solutions: a powerful tool to accelerate toward net zero

Climeworks Solutions allows you to focus on reducing what you can, while we take care of removing what you can't.

Meet your climate targets

Alongside emissions reductions, carbon removal solutions are essential to reaching net zero (IPCC, SBTi).

Future-proof your company

Gain flexibility and security by keeping up-to-date with the latest standards and regulations.

Strengthen your balance sheet

Lock in pricing in a supply-constrained market and secure favorable commercial terms that fit your net-zero budget.

Enhance your brand

Be vocal about your company's climate leadership and benefit from better talent attraction and retention.

How it works

Building a carbon removal portfolio is complex and requires significant effort. Climeworks Solutions simplifies and streamlines the process:

1 We help you identify your needs,

2 We propose technologies that match your requirements best,

3 We tailor, source, and manage your high-quality carbon removal portfolio end-to-end.
